Thank You!

Mrs. Leifer's
Fourth Grade Class
Paton School

Thank you so much
for hosting us at the
Electric Company
on June 8, 2005

We enjoyed it very
much and learned
many things about
Electricity.

Mary Beth Leifer
&
Room 18
Paton School

I learned that birds can't get shocked because they are not grounded.

Kerry

I learned that if you crash into an electrical pole you should stay in your car.

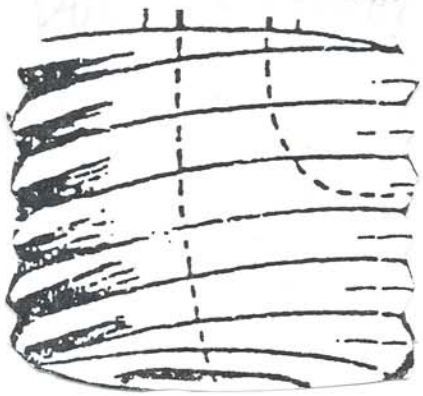
Taylor

Electricity tries to find the fastest way to the ground, and it could be through you.

Scotty Beals

From you I learned that electricity always tries to find its quickest way to the ground by going through metal.

June 10 2005
Andrew Wendler

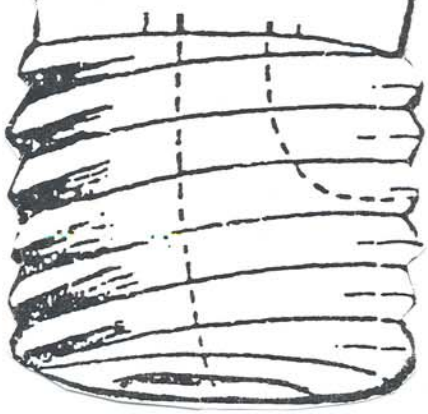


I learnd that if you crash into an electric Pole, you shoud Stay in you'r car.

Micaela Beando

I learned that electricity alway takes the fastest way to the ground so be smart, be safe and don't let that be you.

Dennis



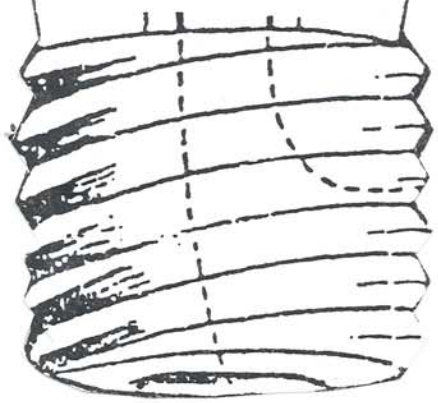
I learned many people get hurt by electricity. Electricity is very powerful. If you touch the wires it will give you a shock, because electricity wants the quickest way to the ground.

Nicole Goodnough

I learned that

birds and Squirrels
Can sit on telephone
wires because
they are not
grounded.

Guy



One Thing I Learned is never
play around with electricity.

Brandon Hazelton

I learned that you have to be grounded to get shocked because electricity tries to get to the ground the fastest way and it could go through you.

Pat Collins

June 10, 2005

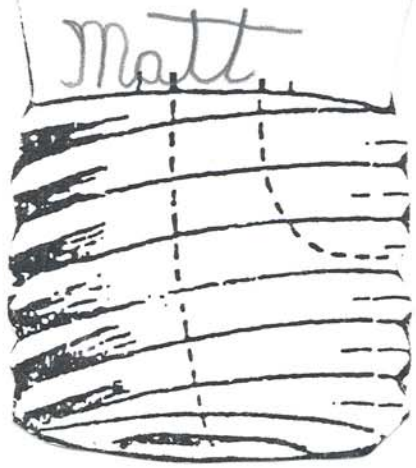
I learned that
if you crash you'r car into
a telephone pole and the wire
catches you'r car on fire you
should jump out of you'r car
with you'r feet together.

Gregory
Polychrons

I learned that you should be careful with electricity because you could get shaked and Die. So you should never play with electricity.

Joshua Morin

Electricity tries to find the fastest way to get to the ground and if your not careful it could go through you!



I learned that if you touch

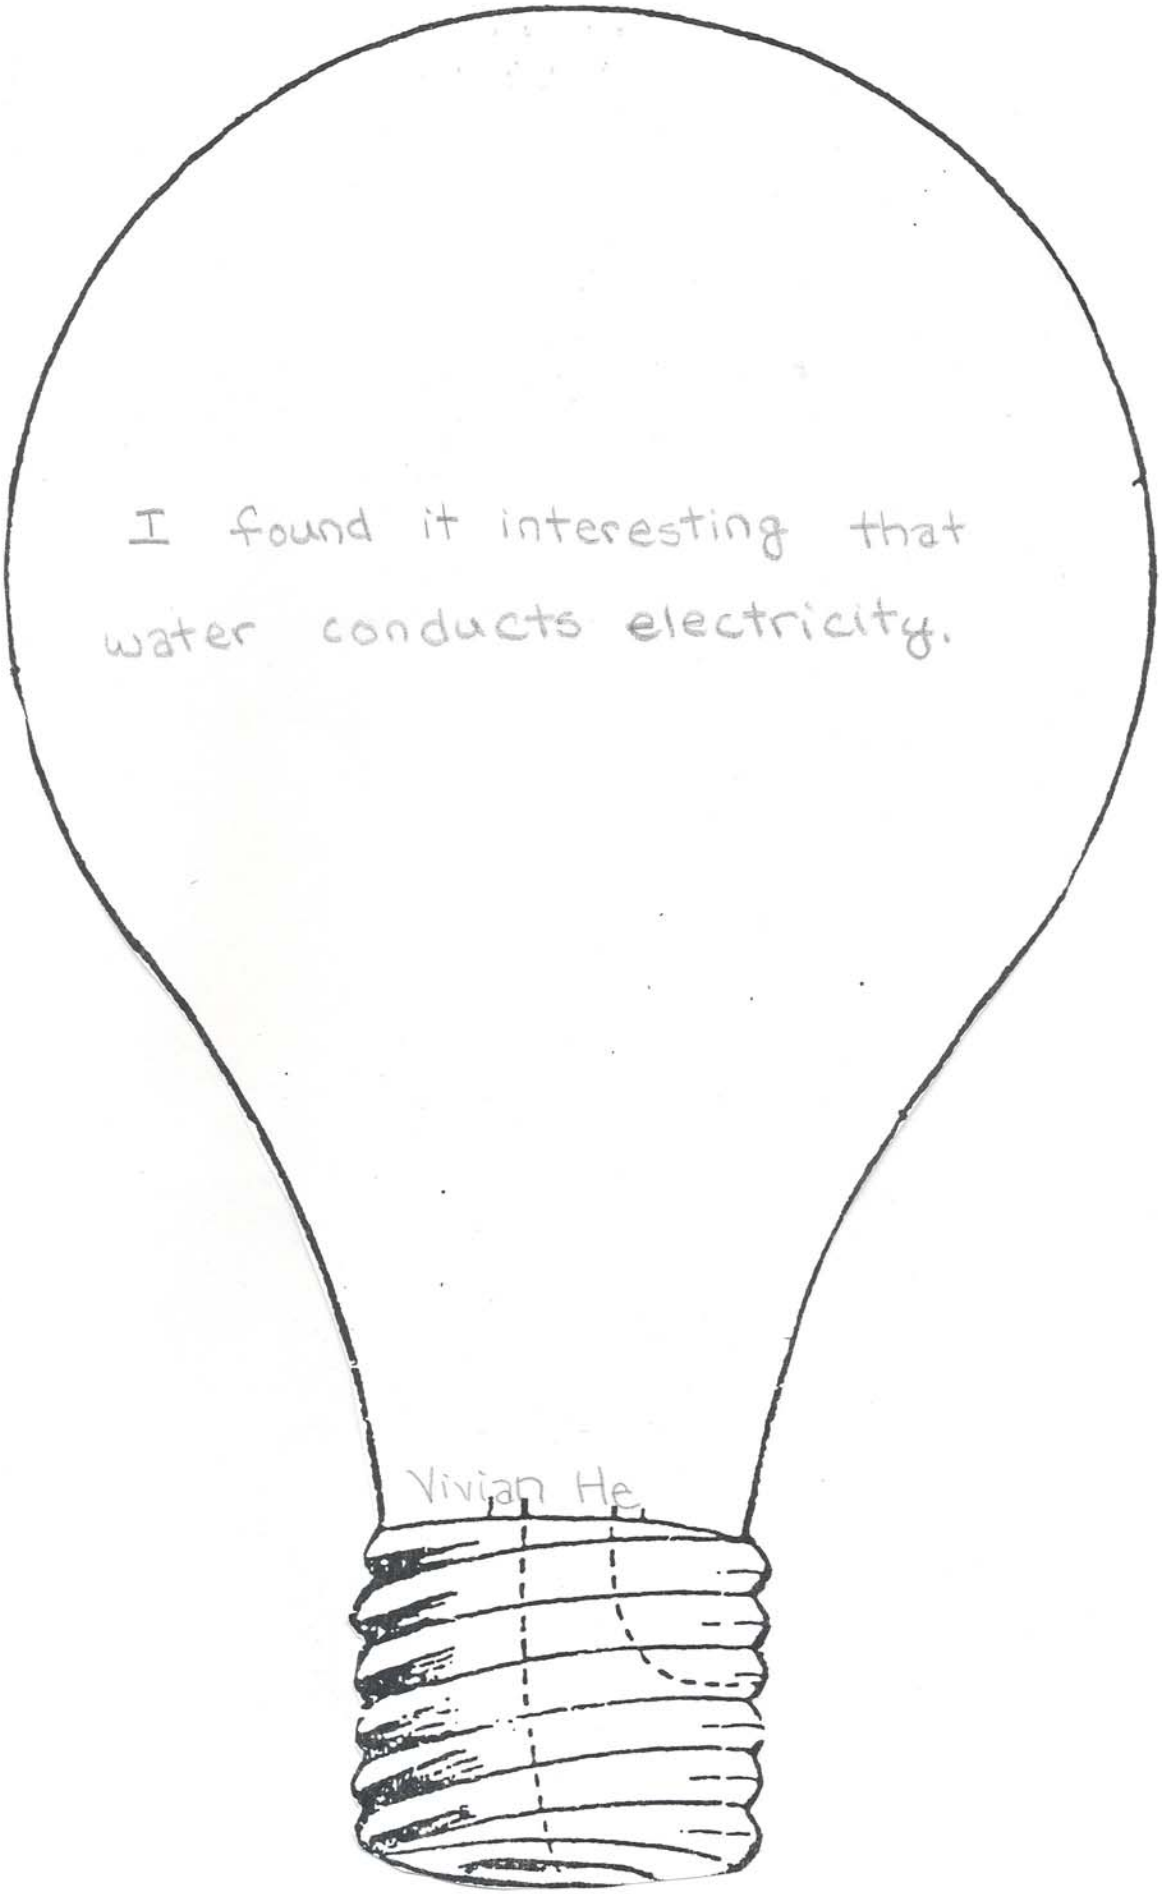
a wire while you are touching the ground

you will get shocked because

electricity always tries

to find the quickest
way to the ground

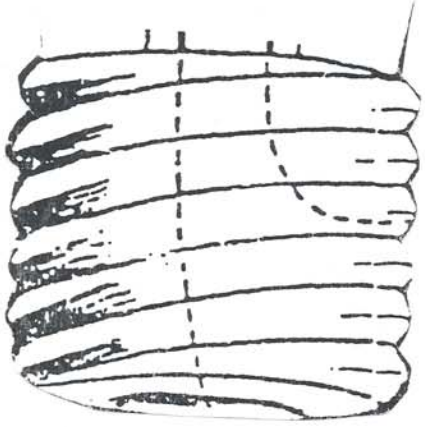
Joe



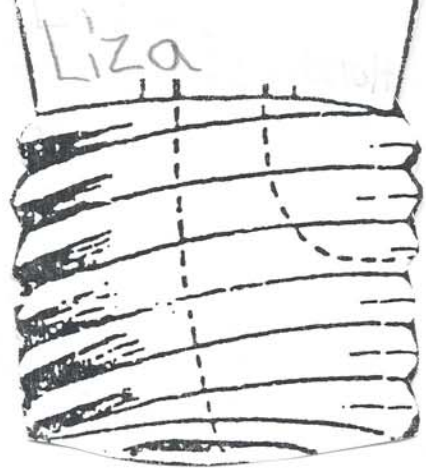
I found it interesting that
water conducts electricity.
Vivian He

One thing I learned was that electricity uses conductors like steel, tin foil, etc. to get to the ground

Raagini R.



I learned that a bird cannot get shocked because they are not touching the ground.



At the electric company I learned electricity just wants to be grounded and it will take the quickest way down, and it could be through you!

Jackie Quirion
